

Declaration of Conformity Directive 94/62 / EC
Environmental compatibility of our packaging systems

Dear Sir or Madam,

hereby we confirm that our packaging systems are the measures Directive 94/62 / EC.

Here is some information below. Our packaging consists of 2 pure ones Components corrugated board and PE or PU film.

Corrugated board can be directly with the waste paper be disposed of.
The laminated film is recyclable and can be reused become.

Since 1992, there is a new Waste Paper Ordinance that allows one secondary component, which has less than 5% of the total packaging, disposed of unseparated can be. This is now also valid throughout Europe.

By recycling in the paper mills, the film separates from the corrugated cardboard (through Water) and is skimmed off above the funnel. This time for purely technical Procedure.

Since the amount of laminated film has far less than 5% share of the packaging can our packaging will be disposed of with the waste paper and thus 100% compliant with the required measures of Directive 94/62 / EC.

Next, we can confirm that our items are the concentration of lead, Cadmium, mercury and chromium VI cumulative 100 milligrams per kilogram not exceeds.

Boris Frankowski
